

2805, Principles of Software Engineering Final Submission

Zaymon Foulds-Cook, s5017391

September 22, 2017

Contents

1	Principles of Software Engineering Milestone 02	2
1.1	Requirements	2
1.2	Product Use Cases	3
1.3	Summary of Software Architecture	3
1.4	Summary of Design	4
	Minimising Coupling	4
	Maximising Cohesion	4
	Optimising Response Time	4
	Facilitating Maintenance	4
	Increasing Modularity	5
1.5	Summary of Design, Diagrams and Code Justification	6
1.6	Discussion of Sophistication Regarding Persistent Data Management, Access Control and User Interface	11
	Persistent Data Management	11
	Access Control	11
	User Interface	11
1.7	Software Testing Testing Plan Feasibility	12
1.8	Version Control	12
	Histogram of Effort	15
